

LUMEN RETAIL — PROJECT BRIEF (PDF extract)

Objective: Reduce average checkout time by 30% in flagship stores using an AI-assisted kiosk.

Functional requirements:

- Scan barcodes and QR codes
- Apply loyalty discounts
- Print or email receipts
- Staff override with 2FA

Non-functional:

- P99 latency under 400ms for scan lookup
- Offline queue for up to 50 baskets

Open question: who owns the PCI-DSS questionnaire?
